

12 Ways We Are different

We prevent cyber attacks before they ever reach you.

27

Ransomware Strains
stopped daily

\$120 Billion

assets under our protection

50 billion

security events collected
and analyzed daily

12 facts you should know about TruShield

Organizations struggle to ensure that safeguards are consistently applied to protect their valuable information. Inconsistencies in security measures are often attributable to variations in available security products, support tools, administration techniques and delivery mechanisms. TruShield will review your organization's security infrastructure to understand the existing information technology control framework; identifying where you are most vulnerable to cyber threats and attacks. Here are twelve ways we do things better and differently.

1 

One Stop Solutions Shop

With us, vendor shopping and piecing together services is a thing of the past. We take care of everything for you, so you can focus on your core business.

2 

Field Experts

We were founded by a team of cybersecurity experts from a wide range of fields. When we find a threat, we understand what it means to your business because we've been there.

3 

Bespoke Approach

We use a white glove approach to customer care. From your first contact with our sales team all the way through our continued service, you will receive the highest-quality attention.

Global Presence

Threats don't just come during business hours. Our global real-time security operations centers run 24/7/365 to ensure we never miss a thing.

Rockstar Treatment

To us, you aren't just another client - you're a top priority. We are always looking for ways to improve your experience, and we have a dedicated Customer Advisory Team to make sure you're always happy.

Comprehensive Service

Our proven prevent, detect, contain, and eradicate approach means threats don't stand a chance. We get to them before they reach you, and if something happens we're experts at making sure it has as little impact as possible.

A Step Ahead

We know the best way to combat threats is to prevent them from occurring in the first place. Our team is constantly learning about the latest developments in the field and innovating new solutions to prevent them from impacting our clients.

Knowledge You Can Use

We educate our clients on threats that may impact their business. Our Advisory Alerts and helpful webinars keep clients on top of the latest issues and threats.

Customized Care

Every business is a target for cybersecurity threats. We ensure that businesses of all size get the best solutions at the most cost effective rates.

We Love Our Product

We trust our own system so much that we use it ourselves. That way, we understand what questions you might have and can anticipate your needs before you even ask.

Communication is Key

We pride ourselves on being in-touch with our clients by keeping open channels of communication. While cybersecurity is often a daunting field for business owners we help you understand what the best solutions are for you and your business.

Powerful Analysis

While we collect and analyze 50 billion security events every day, we still pay attention to the details. We conduct in-depth investigations on more than 100 critical cybersecurity incidents daily.

Contact Us
