

# Complete Cybersecurity Coverage

## We Protect You

TruShield was founded in 2008 by a group of cybersecurity experts who wanted to take the guesswork out of protecting businesses from cyber threats. We recognize that business is being conducted online at a growing rate, and customers are forced to entrust organizations with their sensitive data without knowing if it's really secure. Often, businesses are holding unsecured financial, legal, and medical data for their customers, and cybercriminals are increasingly exploiting this gap in protection. TruShield gives businesses of all sizes a cost-effective and comprehensive data security solution. Our goal is to let you focus on your business, while we keep your sensitive data safe from prying eyes.

assets under our  
protection

# 50 billion

security events collected  
and analyzed daily

## Keep **Your** Information Safe

Whether you are a small clothing shop or an international financial corporation, a multi-million dollar organization or a startup office, everyone is at risk of a cyber attack. Most businesses do not know their data has been compromised until it's too late. TruShield helps you by watching out for your digital assets so that you don't have to worry your reputation, business, or customers will be damaged by criminals stealing and using this sensitive information.

# Complete Cybersecurity Coverage

Your customers expect you to keep the information they give you private. Is your business protected against an attack?

TruShield uses a proven 4-step method to secure your data.

1

## Prevent

The best protection is to prevent incidents from ever occurring. We are constantly educating ourselves on threat trends and new hacker tricks. This helps us get to them before they ever get to you.

We prevent cyber attacks before they ever reach you.

2

## Detect

We have global real-time security operations centers keeping your information secure at all times. If we find a potential issue we react immediately, giving you the best line of defense possible.

3

## Contain

If we detect any issues, we lock them down instantly. This stops the issue from spreading to other important data you have and makes removing the threat much simpler.

Keep your customers happy by securing their private information.

4

## Eradicate

Once a threat is contained we ensure that it is completely destroyed leaving your information safe and secure.
